

The most cost-effective Interactive Whiteboard system

world map

Not sure yet? Or ...like the concept, but budget conscious ? No compromise on fundamental IWB functions, but features full functions of interactive whiteboard system. Consisting of only a wall-mounted station, smooth writing digital pen and an annotation SW, the uBoard Lite is ideal for virtually any organization in most cost-effective way.

No bulky components means the entire system can fit inside a laptop bag with room to spare. Especially, it is great for use with such popular Microsoft applications as PowerPoint®, Excel® and Word® as uBoard can fully utilize Microsoft Ink functions embedded in them by default. Unlike other interactive devices, full conformation of HID standard device enables uBoard Lite to be easily functioned as a typical mouse device as well as the pen device. Additionally, full tablet functions which can be automatically enabled by the uBoard Lite connection really maximize user convenience. Automatic display of the input panel next to any input field and using Microsoft character recognition can be good examples of it.

....These are only fraction of uBoard Lite fuctions.

Experience it right now... Then you can realize why uBoard Lite is the most practical interactive whiteboard system in the world.

KEY BENEFITS

Investment Protection :

Full compatibility with existing computer and any beam projector makes you completely protected by the existing investment.

Much practical system :

uBoard practically supports up to 120" working screen on any surface with same cost. Comparing with other board built - in interactive whiteboard systems supporting this screen size, you can realize the uBoard is very cost effective solution. Moreover, using sticky non-glare hard coated film on existing chalkboard can save cost and increase convenience dramatically by taking full advantages of using both digital pen and dry wipe pen.

No need to learn:

The uBoard is very easy and intuitive device which not requires additional time to learn IWB functions

Rich convenient features :

The uBoard is designed to provide incomparable user convenient features such as auto recognition of input field, MS ink support and many others.

Constant Learning :

The uBoard's simple and robust architecture removes downtime and makes it simple & easy maintenance.

Inspire Lecture and/or Presentation :

Its Interactive enabling features on any flat surface let you produce teaching materials quickly & saved on the computer or have differentiated and valuable presentation.

FEATURES

High portability

- Easy attachment w/ Magnet
- Ultra-light weight
- A distinctive slim & stylish design
