

PowerShot S60-NEW

Fast, powerful and intuitive: the 5.0 Megapixel PowerShot S60 bursts with professional features, yet is compact enough to take everywhere. A finely crafted tool with which to indulge your creativity.

Features

- 5.0 Megapixels
- 3.6x wide angle optical zoom lens
- Canon UA glass-moulded aspherical lens ensures slim body
- 13 shooting modes
- DIGIC and iSAPS
- 9-point AiAF
- Print/Share button
- PictBridge/Canon Direct Print compatible
- Wide range of accessories
- CIG* access

As big as your imagination, as small as your pocket

Built to impress

The compelling 5.0 Megapixel power of the PowerShot S60 will capture all the detail you need for effective, practical cropping, and full prints to A3 size. A new Canon original ultra-high refractive index aspherical UA lens yields a remarkably thin body and an incredibly compact 3.6x optical zoom lens. The focal length range of 28mm wide angle to 100mm telephoto (35mm format equivalent) is extendable to an impressive 200mm with use of an optional tele-converter. A macro function allows shots from as close as 4cm.

Designed for freedom

A vast array of features is protected by a remarkably sleek, elegant and superbly finished compact capsule that you will want to take with you wherever you go. Use the SLR-style Mode Dial on the top of the camera to shift quickly and easily between 13 different shooting modes including VGA movie and custom modes. Lossless RAW format file recording is supported for ultimate control.

Processing power

Canon's DIGIC processor executes complex functions at high speed, delivering superb image quality, fast and accurate auto focus and up to 2 frames per second continuous shooting speed. iSAPS instantly analyses the scene and makes adjustments even before the shutter release is pressed, optimising exposure, white balance and auto-focus settings in every shooting situation.

Focus and exposure

The 9-Point Artificial Intelligent Auto Focus (AiAF) system automatically detects subject from nine fixed focusing areas across the frame, keeping even off-centre subjects in-focus. FlexiZone AF/AE lets you scroll the auto focus area around the frame to select the desired subject and weights exposure accordingly.

Advanced printing

The camera prints directly to all PictBridge or Canon Direct Print compatible printers. Create beautiful, instant photo prints by connecting camera to printer and pushing the Print/Share button, which also speeds up uploads to any Windows PC.
