Play   OFF

No more lost remote controls, empty batteries and time consuming instructions
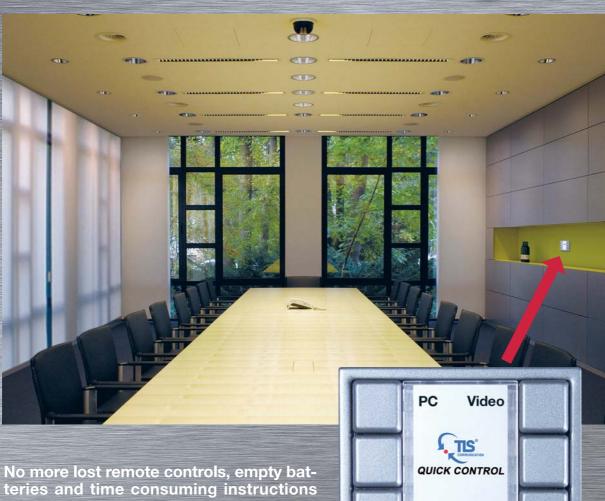

The new **TLS Quick Control** is the perfect solution for any conference room, training center and class room. Thus, even untrained users will immediately be able to switch on/off, to select sources, to control the volume, to control connected screens, blinds or ceiling lifts.

The **TLS Quick Control** is working completely software-independent. This way, it is possible to connect all devices of a conference room or of a training center ñ including the control of 230 V connected devices.

iSize is also perfect. Thanks to its small dimensions the **TLS Quick Control** fits in almost any wall and table module. You label the buttons yourself ñ according to your requirements 232 V.

Shortly noted: Using the **TLS Quick Control** you may avoid time-consuming instructions of people using the devices only from time to time as well as searching for remote controls or new batteries.
