SanDisk® Cruzer® Micro and Cruzer Titanium USB Flash Drives

Smarter. Smaller. Simpler.

Introducing the Cruzer Micro and Cruzer Titanium...the ultimate in portable and personalized flash drive technology

SanDisk Cruiser and U3™ Technology—a Smart Combo

The Evolution of the Flash Drive

Now you can take more with you, more easily. The completely redesigned Cruiser Micro and Cruiser Titanium USB flash drives both feature advanced U3™ smart technology, so you can take your entire personal workspace with you, including your programs, files, and personalized settings. What's more, the Cruiser Micro and Cruiser Titanium feature a sleek new form factor with an easy-to-use retractable USB plug that eliminates the need for caps. SanDisk has a USB flash drive that's just right for you—whether you prefer the lightning-fast and durable Cruiser Titanium or the high-capacity Cruiser Micro. When you choose a SanDisk USB flash drive you can rest assured that you have our latest advancements in hardware and software technology so that you get a more-evolved flash drive.

SanDisk Cruiser and U3 Technology—a Smart Combo

Innovative U3 smart technology has helped transform USB flash drives from simple storage devices into smart drives. Now you can have both your files *and* your programs on the go. U3-powered smart drives like the SanDisk Cruiser Micro or Cruiser Titanium give you instant access to your personal applications and files wherever you are. Just plug your U3 smart drive into any PC running Windows 2000 or XP, and run your personal applications from the USB drive. And, U3 technology is

designed to leave no trace on host computers once the smart drives are removed, resulting in improved system stability and increased personal privacy and protection.

Preloaded and Ready for More

Both the Cruiser Micro and Cruiser Titanium come preloaded with several useful software tools accessible through the U3 launch pad. Plus, additional U3-compatible applications will be available for purchase and download in the future through the launch pad.* This includes programs that are exclusively available to SanDisk customers. Today, your free preloaded applications include:

- **Skype™**—call PC to PC around the world for free, or call from a PC to a phone for pennies. Includes 30 free PC-to-phone calling minutes!
- **avast!™**—full-featured antivirus protection, to help protect the data on your USB drive, even if a machine you plug it into is infected.
- **CruzerSync™**—bring your Cruiser with you and synchronize your Outlook® folders and any files for folders (i.e., Favorites) you choose.
- **SignupShield™**—keep your log-in passwords stored in a safe place for easy retrieval.

* Additional programs available for download free or purchased via www.u3.com.

SanDisk Cruiser Micro: Smart, Small, Affordable

The impossibly small Cruiser Micro comes in 512MB, 1.0GB, 2.0GB and a whopping 4.0GB.** This affordable flash drive features the new U3 smart technology so you can now carry your programs, as well as your files, with you. With the high levels of storage capacity, you can now take even more of your music, photos, presentations, video clips, and documents with you. But more storage doesn't mean more bulk. In fact, the Cruiser Micro is one of the smallest USB flash drives we've ever made—thanks in part to the sleek new capless design that enables you to slide the USB plug out when in use, and into its protective housing while on the go.

2GB Cruiser Micro

4GB Cruiser Micro

** 1 megabyte (MB) = 1 million bytes; 1 gigabyte (GB) = 1 billion bytes. Some of the listed capacity is used for formatting and other functions, and thus is not available for data storage.

2GB Cruiser Titanium

SanDisk Cruiser Titanium: Fast, Rugged, Smart

For the ultimate performance from a USB flash drive, look no further than the Cruiser Titanium. With write speeds exceeding 15MB per second, the Cruiser Titanium leaves other flash drives lagging behind. And, as an outer expression of its inner-strength, the Cruiser Titanium is housed in a virtually indestructible Liquidmetal® casing for unprecedented durability. Able to withstand in excess of 2,000 pounds of crush force, the scratch-and dent-resistant Cruiser Titanium is one rugged USB flash drive. Brawn meets brains with the inclusion of the new U3 smart technology on the Cruiser Titanium, so you can now carry your programs, as well as your files, with you. The Cruiser Titanium packs all these features into the same small dimensions as the Cruiser Micro, and also features the worry-free capless, retractable USB plug design. Currently available in 1GB and 2GB configurations, Cruiser Titanium is the ultimate USB flash drive choice for power users.
